**Re: Wind Chill and Weather Watch**

---

**Starting Wednesday, December 21, until Friday, December 23, the Denver metro area will be under a Wind Chill and Dangerously Cold winter weather alert. The combination of wind and cold temperatures will create dangerously cold wind chill. Avoid outside activities if possible. The dangerously cold wind chills could cause frostbite on exposed skin in as little as 5 minutes.**

**When outside, limit exposure time and make sure you dress warmly in several layers of clothing, including a hat and mittens.**

**Please keep your thermostat turned up to a minimum of 68 degrees during the day and overnight. Please open the cabinet doors in your kitchen and bathroom to allow warm air to circulate and prevent frozen pipes.**
